SUMMARY

Game design graduate expert in Unity, C#, 3D modeling, and environment design. Experienced in building assets, shaders, and particle systems for 3D games. driven to creating realistic worlds and providing extraordinary player experiences.

TECHNICAL SKILLS

- Maya: 3D Modeling, UV Mapping
- ZBrush: Sculpting, Detailing
- Substance Painter: Texturing, Photoshop
- Game Engine: Unity

EXPERIENCE

Texture Artist Intern | Ikarus 3D

- Produced game-ready PBR asset sets (albedo, roughness, metallic, normal) in Substance Painter, meeting studio quality and polycount standards.
- Collaborated with the 3D art team on UV layout and texture optimization, contributing to an asset production pipeline over a 2-month internship.

PROJECTS

Zorb Fight | Unity3D https://d3d-studios.itch.io/zorb-fight

- Assets Design: Create game-ready 3d assets using Maya and Substance Painter. Ensured clean topology, optimised UVs, and PBR-ready textures for smooth performance in Unity.
- Particle System: Implemented VFX such as collision bursts, scoring effects, and movement trails using Unity's particle system
- Shader Graph work: Developed a custom Shader Graph material.
- Gameplay Integration: Collaborated with designers and programmers to integrate assets, VFX, and shaders into gameplay mechanics.

The Forgotten Asylum | Unity3D https://d3d-studios.itch.io/the-forgotten-asylum

- Environment Design: Designed and built atmospheric 3D environments that fit the horror theme, including corridors, rooms, and interactive spaces.
- Level Planning & Layout: Planned level flow, puzzles, navigation, and blockouts—iterating layouts to balance exploration, challenge, pacing, and narrative progression.
- Asset Creation & Dressing: Produced and assembled environment props using Maya and Substance Painter. Carefully placed assets to create an atmosphere and guide player attention.
- Optimisation & Testing: Managed polycount and texture budgets; implemented a 2 × 2 m occlusion culling grid, reducing draw calls and improving target hardware frame rate.

EDUCATION

Bachelor of Design in Game Design 2019 - 2023
From Artemisia College of Art & Design, Indore,MP

Malwa College ITI, Patiala 2017 - 2019
Electrician

Kendriya Vidyalaya No.2, Patiala 2016
Secondary Education
